

New Decoration Panel (Seamless · Hidden Display)

New decoration panel has a high quality decoration and shows display or switches only when required.

Case

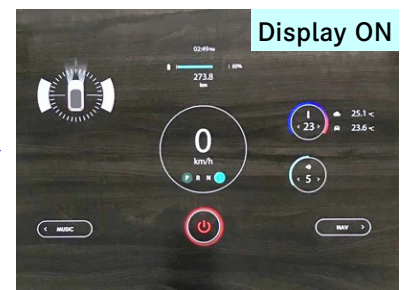

- So many displays and switches spoil interior design.
- Want to make a car interior into comfortable living space.

Solution

Achieving futuristic seamless design by integrating high definition woodgrain/Technical pattern decoration and optical capability for display/switch on demand. DNP offers new concept for interior space.

Feature

- Displaying information on demand
- Reproduce crisp images (full color, white color expression, optical adjustment)
- Versatile design expression (wooden grain, metallic, geometric, and so on)

Utilization

- Automotive interior symbol indicator, control switch, infotainment display, and so on.
- Housing equipment, home appliances remote controller, control panel, and so on.
- Digital signage wall display, information display, and so on.
