

Barrier Film Manufacturing Technology against Water Vapor

DNP

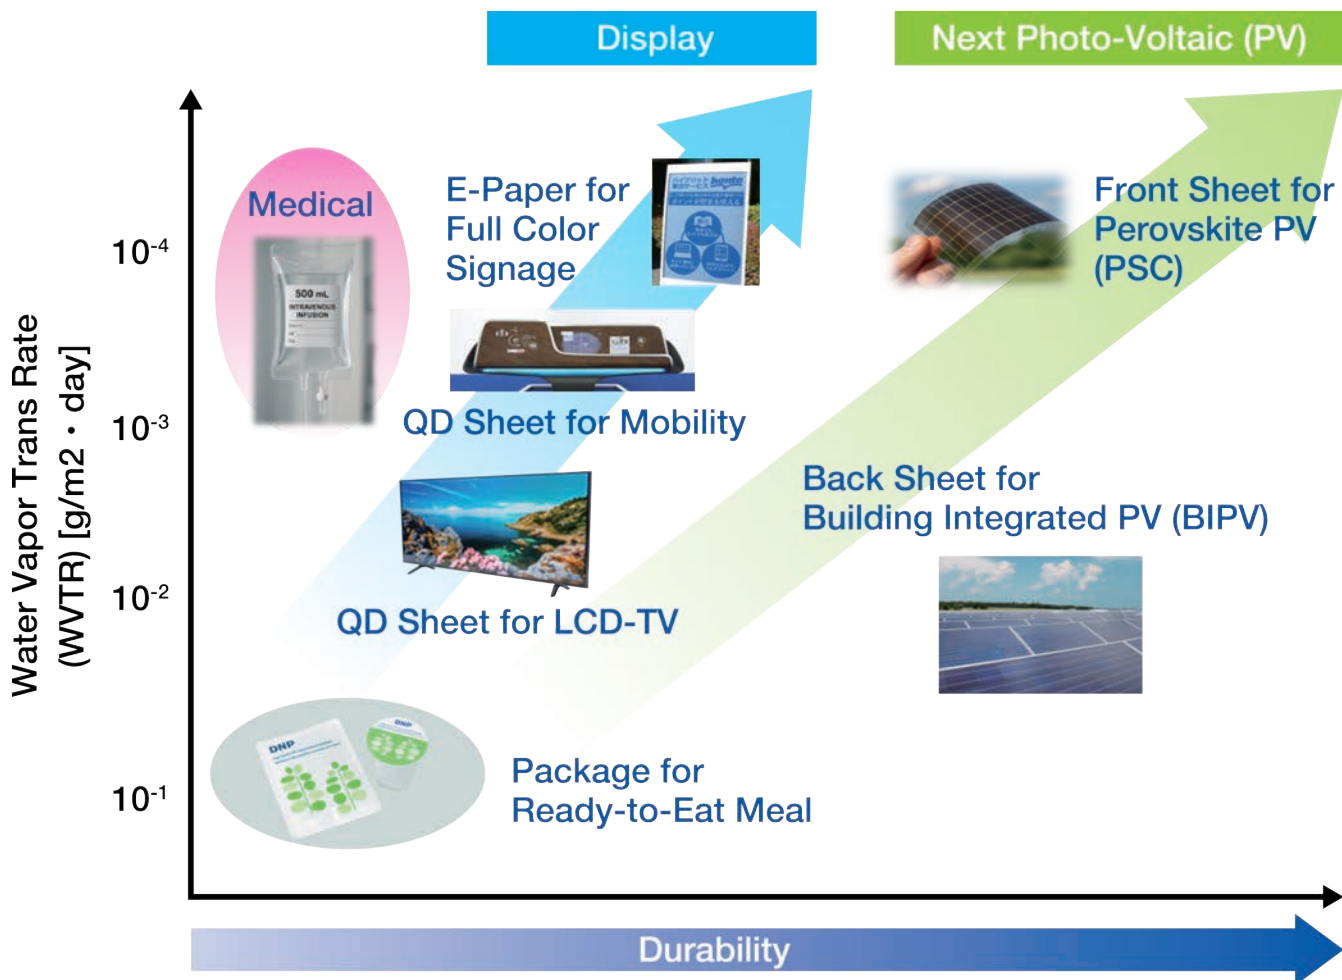

SUMMARY AND ADVANTAGES

- Achieves high barrier performance by combining deposition and coating technologies originally developed for food packaging
- Provides barrier films that support carbon neutrality and a circular economy

FEATURES

- High Barrier Performance (WVTR: 10^{-3} – 10^{-4} g/m²·day)
- High Transparency with Good Optical Properties
- Durability Performance (Tested at 85°C / 85% RH)
