

# Ultra-Low Sparkle AG for OLED

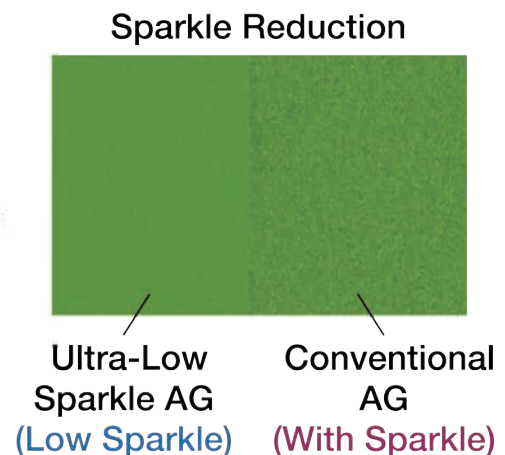

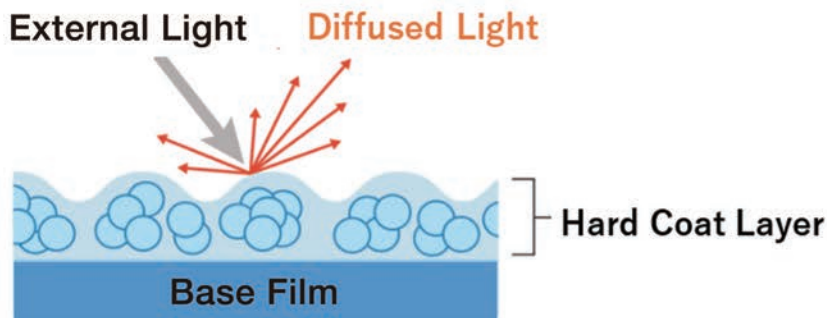

## SUMMARY AND ADVANTAGES

- Suppresses sparkle while preserving resolution
- Controlled microstructure design enhances contrast under ambient light with deeper blacks
- Durable surface for touch application

## FEATURES

- Optimized structure for high-pixel-density OLED panels
- Improved visibility in bright office and outdoor environments compared to standard AG

### Principle of Anti-Glare (AG) Film

### Customized Glare Control

Low  High  
Glare Level

## APPLICATIONS

- OLED Devices - Laptop PCs
