#### (2) Reasons for the revision

During the first nine months of the fiscal year through March 31, 2026, consolidated income increased thanks to stronger than expected demand in smart communications and other areas, and to successful cost structure improvements in various businesses.

As a result of these circumstances and the fact that the yen depreciated on currency markets more than previously expected, the Company revised its consolidated earnings forecast for the full fiscal year ending March 31, 2026, which it made public on May 13, 2025.

Note: The above forecast was prepared based on information available as of the date of publication of this document, and actual results may differ from the forecast due to a variety of factors that may emerge in the future.
