1. Differences between consolidated earnings forecasts for the fiscal year ended March 31, 2018 and actual results (April 1, 2017–March 31, 2018)

Note: DNP implemented a share consolidation in which two shares of common stock were consolidated into one share effective October 1, 2017. Accordingly, we have estimated net income per share assuming this share consolidation was implemented at the start of the previous consolidated fiscal year.

2. Reasons for the differences

Net sales fell short of our forecast during the fiscal year ended March 31, 2018, but operating income, ordinary income, and net income attributable to parent company shareholders were higher than our forecasts as a result of firm performances in the Electronics segment, the Industrial Supplies business, and information security-related business in the Information Innovation business.
